

KEYERA

PROJECT HISTORY

- 1984 Constructed
- 1990 Major expansion (amine train, sweet inlet compression, sulphur train, chill-down unit)
- 2003 Water injection system and low pressure contactor upgrade
- 2008 Acquired from ATCO Midstream
- 2008 Keyera became the operator
- 2015 Connected to Twin Rivers Pipeline System and North ICONN
- 2016 Sulphur plant shut down
- 2018 Connected to Keylink Pipeline

PRODUCT DELIVERIES

- Sales gas TransCanada Pipelines
Elk River South Station
- NGLs Keylink Pipeline
- Condensate Pembina Pipeline

WEST PEMBINA GAS PLANT

Headquartered in Calgary with operations focused in Western Canada, KEYERA operates an integrated Canadian-based midstream business with extensive interconnected assets and depth of expertise in delivering midstream energy solutions.

Our business consists of natural gas gathering and processing, natural gas liquids (NGLs) fractionation, transportation, storage and marketing, iso-octane production and sales and diluent logistic services for oil sands producers.

We are committed to conducting our business in a way that balances diverse stakeholder expectations and emphasizes the health and safety of our employees and the communities where we operate.

West Pembina Gas Plant

Located in Alberta's west country, 130 kilometres southwest of the city of Edmonton, the West Pembina gas plant is a sweet gas processing facility with lean oil absorption and refrigeration. The Plant receives its raw gas to process from numerous wells connected by an extensive network of pipelines.
