

**PROJECT HISTORY**

- 1956** Constructed
- 1972** Facility expansion
- 1985** Sulphur unit expansion/upgrade
- 1993** DCS upgrades, new inlet compression and P/L expansion completed
- 2008** Keyera became the operator
- 2014** NGL trucked in skid added

**PRODUCT DELIVERIES**

- Sales gas** TransCanada Pipeline system
- Propane** Truck or rail
- Butane** Truck or rail
- Condensate** Truck
- Sulphur** Truck

**NEVIS GAS PLANT**

*Headquartered in Calgary with operations focused in Western Canada, **KEYERA** operates an integrated Canadian-based midstream business with extensive interconnected assets and depth of expertise in delivering midstream energy solutions.*

Our business consists of natural gas gathering and processing, natural gas liquids (NGLs) fractionation, transportation, storage and marketing, iso-octane production and sales and diluent logistic services for oil sands producers.

We are committed to conducting our business in a way that balances diverse stakeholder expectations and emphasizes the health and safety of our employees and the communities where we operate.

**Nevis Gas Plant**

Located approximately 28 kilometers west of the town of Stettler, Alberta and 56 kilometres east of the city of Red Deer, the Nevis gas plant processes inlet sour gas and natural gas liquids into sweet sales gas, propane, butane, condensate and sulphur. The raw inlet gas and liquids are transported to the plant through an intricate pipeline gathering system.

**Nevis gas plant produces spec propane/butane/condensate, spec sulphur and sales gas (methane).**
