

PROJECT HISTORY

- 1950s** Constructed
- 2001** Hull Terminal ceased operations
- 2012** Keyera acquires terminal from ExxonMobil
- 2014** Facility grand opening and commissioning

HULL TERMINAL

*Headquartered in Calgary with operations in Western Canada and Hull, Texas, **KEYERA** operates an integrated Canadian-based midstream business with extensive interconnected assets and depth of expertise in delivering midstream energy solutions.*

Our business consists of natural gas gathering and processing, natural gas liquids (NGLs) fractionation, transportation, storage and marketing, iso-octane production and sales and diluent logistic services for oil sands producers.

We are committed to conducting our business in a way that balances diverse stakeholder expectations and emphasizes the health and safety of our employees and the communities where we operate.

Hull Terminal

Situated near one of North America's key energy hubs in Mont Belvieu, Texas, the Hull Terminal is connected via pipelines with ExxonMobil's Beaumont complex, the Daisetta storage facility and other NGL infrastructure in the area.

The Terminal handles the receipt and delivery of valuable NGLs including propane, butane, iso-butane and NGL mix for delivery to and from various North American markets.

In 2014, Keyera completed its redevelopment of the site and refurbishment of the equipment. With a capacity of 11,000 bbls/d, Keyera is developing and expanding the terminal as demand for its services evolve.
