

KEYERA

PIPESTONE GAS PLANT

Headquartered in Calgary with operations focused in Western Canada, KEYERA operates an integrated Canadian-based midstream business with extensive interconnected assets and depth of expertise in delivering midstream energy solutions.

Our business consists of natural gas gathering and processing, natural gas liquids (NGLs) fractionation, transportation, storage and marketing, iso-octane production and sales and diluent logistic services for oil sands producers.

We are committed to conducting our business in a way that balances diverse stakeholder expectations and emphasizes the health and safety of our employees and the communities where we operate.

Pipestone Gas Plant

Located approximately 45 kilometres northwest of Grande Prairie, the Pipestone gas plant is a sour gas processing and liquids stabilization plant supporting liquids-rich Montney development in the area. The plant includes acid gas injection facilities, the most reliable and environmentally responsible method to deal with sour gas, virtually eliminating carbon emissions as compared to other acid gas handling processes. Keyera will own the facilities while Encana will initially operate.

The plant is expected to be operational in 2021 and will include 200 mmcf/d of sour gas processing capacity, and 24,000 bbls/d of condensate handling capacity. The facility also includes a liquids hub that commenced operations in September 2018 with the capacity to handle 14,000 bbls/d of condensate. Pipestone will be designed to include a second phase that could add an additional 200 mmcf/d.

1 Project timing and cost subject to timely receipt of regulatory approvals and construction schedule variables.

PROJECT HISTORY

- Sep 2018** Liquids hub commenced operations
- 2021** Plant expected to be completed¹

PRODUCT DELIVERIES

- Gas** TransCanada Pipeline
- NGLs** Pembina Peace Pipeline
- Condensate** Pembina Peace Pipeline
