

KEYERA

### PROJECT HISTORY

- 1992 Construction completed
- 2002 AEF converted to produce iso-octane
- 2012 Keyera purchased AEF
- 2015 Truck loading facility added

### ADDITIONAL INFORMATION

Iso-octane is a premium gasoline blending component used by refiners and gasoline blenders to create premium-grade gasoline and to help meet stringent reformulated gasoline specifications.

## ALBERTA ENVIROFUELS

*Headquartered in Calgary with operations focused in Western Canada, KEYERA operates an integrated Canadian-based midstream business with extensive interconnected assets and depth of expertise in delivering midstream energy solutions.*

Our business consists of natural gas gathering and processing, natural gas liquids (NGLs) fractionation, transportation, storage and marketing, iso-octane production and sales and diluent logistic services for oil sands producers.

We are committed to conducting our business in a way that balances diverse stakeholder expectations and emphasizes the health and safety of our employees and the communities where we operate.

### Alberta EnviroFuels (AEF)

Alberta EnviroFuels (AEF) is the largest iso-octane manufacturing facility in the world. Iso-octane is a high octane gasoline blending component. The facility produces enough product to fuel approximately 45,000 vehicles per day. Product is sold to refineries for blending into their premium gasolines. Iso-octane is sold to customers in Western Canada and the United States.

Alberta EnviroFuels is located in Edmonton, Alberta.
