										-	

Additional Notes: The vast majority of Keyera Corp.'s business involves midstream activities which do not relate to the reporting requirements of ESTMA. However, Keyera Corp. does have a small portion of its business which involves the commercial development of oil and gas as a result of its ownership of legacy wells in Alberta and British Columbia. As a result, federal and provincial corporate tax payments are based on calculated estimates. The calculation is based on a proration of operating margins generated from the commercial development of oil & gas reserves as a percentage of total operating margin for Keyera Partnership (the operating subsidiary of Keyera Corp.). The percentage is then applied to the total corporate tax installments made by Keyera Corp. (the managing partner of Keyera Partnership) in order to derive the estimated corporate tax payments related to Keyera Corp.'s operating activities associated with its commercial development of oil & gas reserves. Further, Keyera Partnership (the operating subsidiary of Keyera Corp.) is the operator of certain gathering and processing facilities which are co-owned with other third parties who may be ESTMA reportable entities. Amounts reported herein include payments made on behalf of non-operator owners of these gathering and processing facilities, most notably property taxes.

Extractive Sector Transparency Measures Act - Annual Report
