Forward-Looking Information & Non-GAAP and Other Financial Measures

To provide readers with information regarding Keyera, including its assessment of future plans, operations and financial performance, certain statements contained herein contain forward-looking information within the meaning of applicable Canadian securities legislation (collectively, “forward-looking information”). Forward-looking information relate to future events and/or Keyera’s future performance. Forward-looking information are predictions only; actual events or results may differ materially. Use of words such as “anticipate”, “continue”, “estimate”, “expect”, “may”, “will”, “project”, “should”, “plan”, “intend”, “believe”, and similar expressions (including negatives thereof), is intended to identify forward-looking information. All statements other than statements of historical fact contained herein are forward-looking information, including, without limitation, statements regarding future dividends, future financial position of Keyera, future returns from capital projects, Keyera’s vision, business strategy and plans of management, anticipated growth and proposed activities, future opportunities, expected capacities associated with capital projects, expected sources of and demand for energy, estimated utilization rates, and expected commodity prices and production levels.

Forward-looking information reflect management’s current beliefs and assumptions with respect to such things as outlook for general economic trends, industry forecasts and/or trends, commodity prices, capital markets, and government, regulatory and/or legal environment and potential impacts thereof. In some instances, forward-looking information may be attributed to third party sources. Management believes its assumptions and analysis are reasonable and that expectations reflected in forward-looking information contained herein are also reasonable. However, Keyera cannot assure readers these expectations will prove to be correct.

All forward-looking information involve known and unknown risks, uncertainties and other factors that may cause actual results, events, levels of activity and achievements to differ materially from those anticipated in the forward-looking information. These unknown risks, uncertainties, and other factors affecting Keyera and its business are contained in Keyera’s 2021 Year-End Report and in Keyera’s Annual Information Form, each dated February 16, 2022, each filed on SEDAR at www.sedar.com and available on the Keyera website at www.keyera.com.

Proposed construction and completion schedules and budgets for capital projects are subject to many variables, including the continued uncertainty of the COVID-19 pandemic; weather; availability of and/or prices of materials and/or labour; customer project schedules and expected in-service dates; contractor productivity; contractor disputes; quality of cost estimating; decision processes and approvals by joint venture partners; changes in project scope at the time of project sanctioning; regulatory approvals, conditions or delays (including possible intervention by third parties); Keyera’s ability to secure adequate land rights and water supply; and macro socio-economic trends. As a result, expected timing, costs and benefits associated with these projects may differ materially from descriptions contained herein. Further, some of the projects discussed herein are subject to securing sufficient producer/customer interest and may not proceed if sufficient commitments are not obtained. Typically, the earlier in the engineering process that projects are sanctioned, the greater the likelihood that the schedule and budget may change.

In addition to factors referenced above, Keyera’s expectations with respect to future returns associated with: (i) growth capital projects sanctioned and in development as of the date hereof, and (ii) the KAPS project, are based on a number of assumptions, estimates and projections developed based on past experience and anticipated trends, including but not limited to: capital cost estimates assuming no material unforeseen costs; timing for completion of growth capital projects; customer performance of contractual obligations; reliability of production profiles; commodity prices, margins and volumes; tax and interest rates; availability of capital at attractive prices; and no changes in regulatory or approval requirements, including no delay in securing any outstanding regulatory approvals.

All forward-looking information contained herein are expressly qualified by this cautionary statement. Readers are cautioned they should not unduly rely on these forward-looking information and that information contained in such forward-looking information may not be appropriate for other purposes. Further, readers are cautioned that the forward-looking information contained herein is made as of the date of this Investor Day Presentation. Unless required by law, Keyera does not intend and does not assume any obligation to update any forward-looking information. All forward-looking information contained in this Investor Day Presentation is expressly qualified by this cautionary statement. Further information about the factors affecting forward-looking statements and management’s assumptions and analysis thereof, is available in filings made by Keyera with Canadian provincial securities commissions, which can be viewed on SEDAR at www.sedar.com.

Non-GAAP and Other Financial Measures

This document refers to certain financial and other measures that are not determined in accordance with Generally Accepted Accounting Principles (“GAAP”) and as a result, may not be comparable to similar measures reported by other entities. Management believes that these non-GAAP and other financial measures facilitate the understanding of Keyera’s results of operations, leverage, liquidity and financial position. These measures do not have any standardized meaning under GAAP and therefore, should not be considered in isolation, or used in substitution for measures of performance prepared in accordance with GAAP. For additional information regarding the composition of these measures, how management utilizes them, and where applicable, a reconciliation of Keyera’s historical non-GAAP financial measures to the most directly comparable GAAP measure, or for information about factors affecting forward-looking information, refer to Management’s Discussion and Analysis (“MD&A”) for the year ended December 31, 2021, which is available on SEDAR at www.sedar.com and Keyera’s website at www.keyera.com. Specifically, the sections of the MD&A for the year ended December 31, 2021 titled “Segmented Results of Operations”, “EBITDA”, “Dividends: Funds from Operations and Distributable Cash Flow”, “Adjusted Cash Flow from Operating Activities and Return on Invested Capital” and “Non-GAAP and Other Financial Measures” include information that has been incorporated by reference for these non-GAAP and other financial measures. For Keyera’s compound annual growth rate (“CAGR”) measures, the following calculation is utilized:

$$\text{CAGR} = \left[\frac{\text{End of the period}^*}{\text{Beginning of the period}^*} \right]^{\left[\frac{1}{\text{Number of Years}} \right]} - 1$$

*CAGR for adjusted EBITDA includes adjusted EBITDA specifically related to Keyera’s fee-for-service business.

*CAGR for DCF per share and CAGR for dividends per share includes DCF per share and dividends per share, respectively.

Drivers Of Additional Margin Growth and Returns

Playing A Role In The Energy Transition

Transitioning to A Low-Carbon Economy

Carbon Capture & Storage

- Acid gas injection at six of our existing locations¹
- Potential to provide CCS services for customer

Emissions Reduction

- Emissions on intensity and absolute basis lowered by 35% and 15% from 2017 to 2020
- Actively exploring co-generation opportunities to further lower our overall emissions

Decarbonizing

- Our energy usage with a 15-year solar PPA with Capstone Infrastructure

Clean Fuels

- Exploring opportunities to help refiners meet CFS requirements using iso-octane
- Further enhance the value of iso-octane through decarbonization

Hydrogen

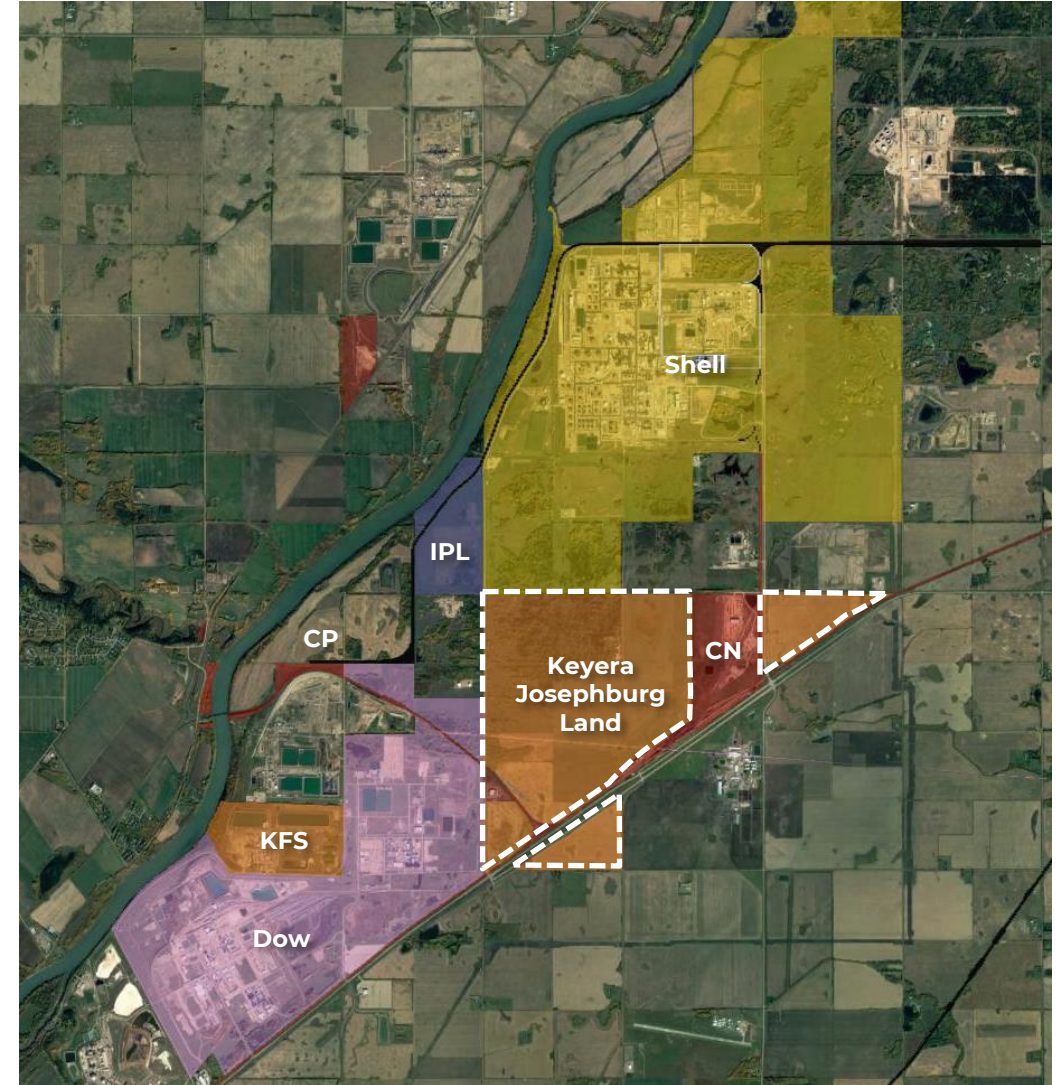

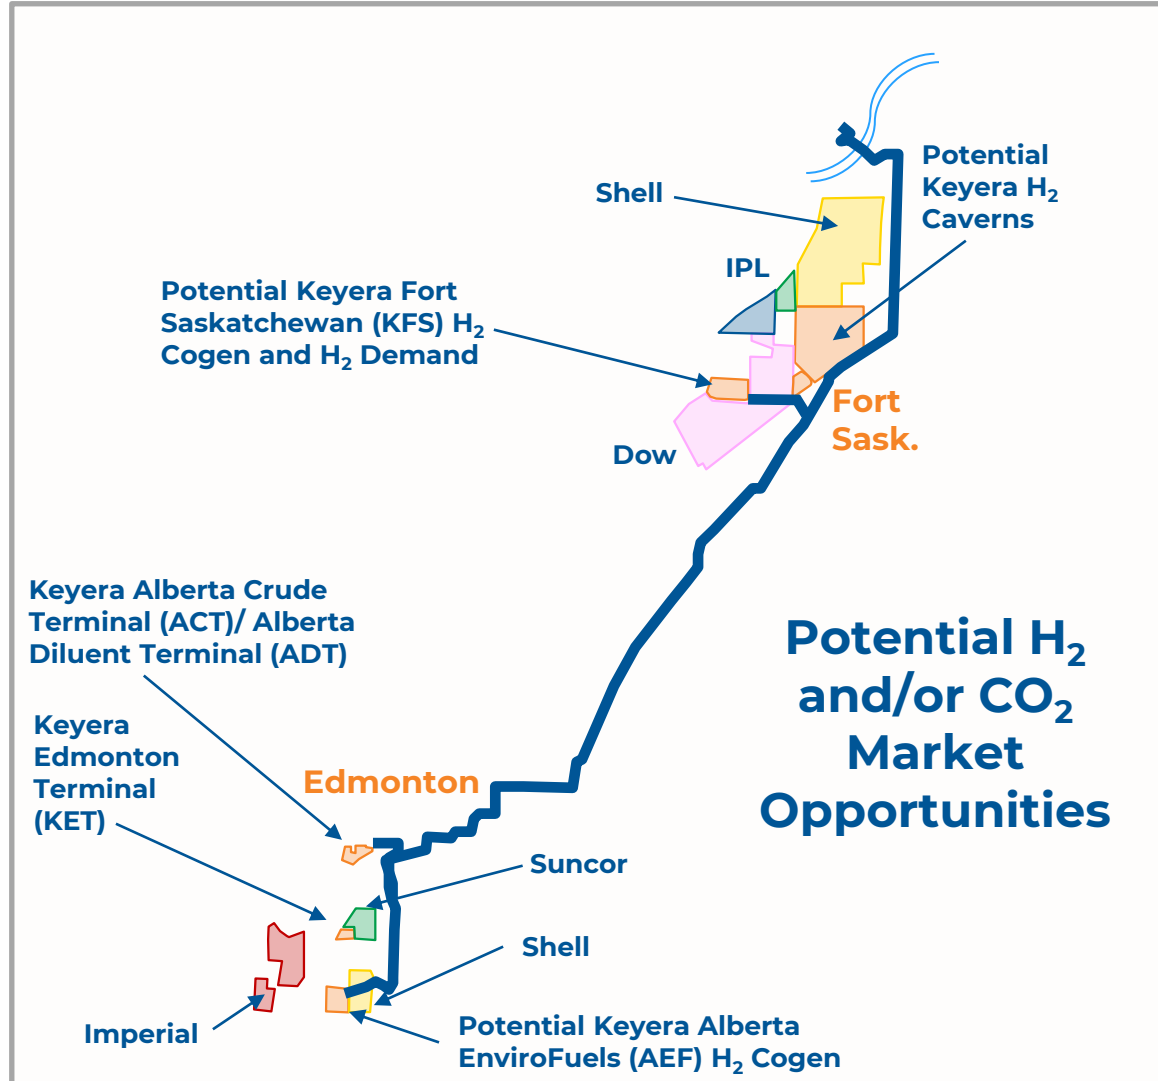

- 1,290 acres of undeveloped land available for H₂ development
- Existing H₂ production
- Existing H₂ pipeline
- Options for H₂ cavern storage

Solvents

- Help decarbonize oilsands production through solvents supply. Solvents include Propane and butane
