Headquartered in Calgary with operations in Western Canada, Texas and Oklahoma, KEYERA operates an integrated Canadian-based midstream business with extensive interconnected assets and depth of expertise in delivering midstream energy solutions.

Our business consists of natural gas gathering and processing; natural gas liquids (NGLs) fractionation, transportation, storage and marketing; iso-octane production and sales; and diluent logistic services for oil sands producers.

We are committed to conducting our business in a way that balances diverse stakeholder expectations and emphasizes the health and safety of our employees and the communities where we operate.

**Wildhorse Terminal**

Wildhorse is a crude oil storage and blending terminal currently under development in Cushing, Oklahoma. The Terminal will include 12 above ground tanks with 4.5 million barrels of working storage capacity.

Wildhorse will initially be connected by pipeline to existing storage terminals at Cushing. This connection will provide customers with access to the majority of the crude oil streams flowing in and out of Cushing on several major pipeline networks.
