Headquartered in Calgary with operations in Western Canada and Hull, Texas, **KEYERA** operates an integrated Canadian-based midstream business with extensive interconnected assets and depth of expertise in delivering midstream energy solutions.

Our business consists of natural gas gathering and processing, natural gas liquids (NGLs), fractionation, transportation, storage and marketing, iso-octane production and sales and diluent logistic services for oil sands producers.

We are committed to conducting our business in a way that balances diverse stakeholder expectations and emphasizes the health and safety of our employees and the communities where we operate.

**Brazeau River Gas Plant**

The Brazeau River gas plant, located approximately 170 kilometres southwest of the city of Edmonton, has the capability and flexibility to process a wide range of sweet and sour gas streams with varying levels of NGL content. Its process includes inlet compression, sour gas sweetening, dehydration, NGL recovery and acid gas injection.

**Brazeau River gas plant is located in the West Pembina area of Alberta.**
