Headquartered in Calgary with operations focused in Western Canada, KEYERA operates an integrated Canadian-based midstream business with extensive interconnected assets and depth of expertise in delivering midstream energy solutions.

Our business consists of natural gas gathering and processing, natural gas liquids (NGLs) fractionation, transportation, storage and marketing, iso-octane production and sales and diluent logistic services for oil sands producers.

We are committed to conducting our business in a way that balances diverse stakeholder expectations and emphasizes the health and safety of our employees and the communities where we operate.

**Alberta EnviroFuels (AEF)**

Alberta EnviroFuels (AEF) is the largest iso-octane manufacturing facility in the world. Iso-octane is a high octane gasoline blending component. The facility produces enough product to fuel approximately 385,000 vehicles per day. Product is sold to refineries for blending into their premium gasolines. Iso-octane is sold to customers in Western Canada and the United States.

**Alberta EnviroFuels is located in Edmonton, Alberta.**
