

Health, Safety and Environment Policy

At Keyera, we are committed to health, safety, and the environment (“HSE”) as part of our core values. We will strive to be a leading performer in our industry. By following the guiding principles shown below, we commit to managing the safety, security, and environmental protection throughout the entire life cycle of our assets. We all play a role in delivering safety and expect everyone at Keyera workplaces to commit to these guiding principles.

RESPONSIBILITY – Everyone has a role to play in delivering safety and protecting the environment. We recognize that HSE is everyone’s responsibility, including all levels of management, supervisors, employees, contractors and visitors. Management must support and demonstrate visible leadership, empowering individuals to safely execute their work. We commit to protecting the psychological and social well-being of everyone as part of our health and safety culture.

COMPLIANCE – To achieve HSE excellence, we will comply with all laws, regulations and Keyera standards applicable to our work. We shall provide the necessary resources, organization and systems to execute work safely and in an environmentally responsible manner.

PREVENTION – The best solution is prevention. We will strive to prevent harm to people and the environment by identifying hazards and applying the necessary controls to manage the risk. We will take the time to do the right thing, the right way, every time. We will care enough to intervene when we see an unsafe condition or behavior. We encourage the reporting of hazards, potential hazards, incidents, and near-misses without fear of reprisal, and no disciplinary action will be taken against those who report.

CONTINUOUS IMPROVEMENT – We will continuously improve in our HSE management and performance by leveraging people, process and technology. We will openly communicate our successes and challenges, focusing on the application of these learnings. We will establish goals for the prevention of ruptures, releases, fatalities and injuries and for the response to incidents and emergency situations.

At Keyera, no job is more important, no service more urgent, than maintaining a safe, healthy and environmentally responsible workplace. Please join us in making this commitment daily and living safety as a value, not just a priority.
